DETAILED ACTION

Claim Objections

1. Claims 16, 25 are objected to because of the following informalities: in cl. 16, "selective" perhaps should be "selectively"; in cl. 25, "the front link" perhaps should be "a front link." Appropriate correction is required.

Claim Rejections - 35 USC § 102

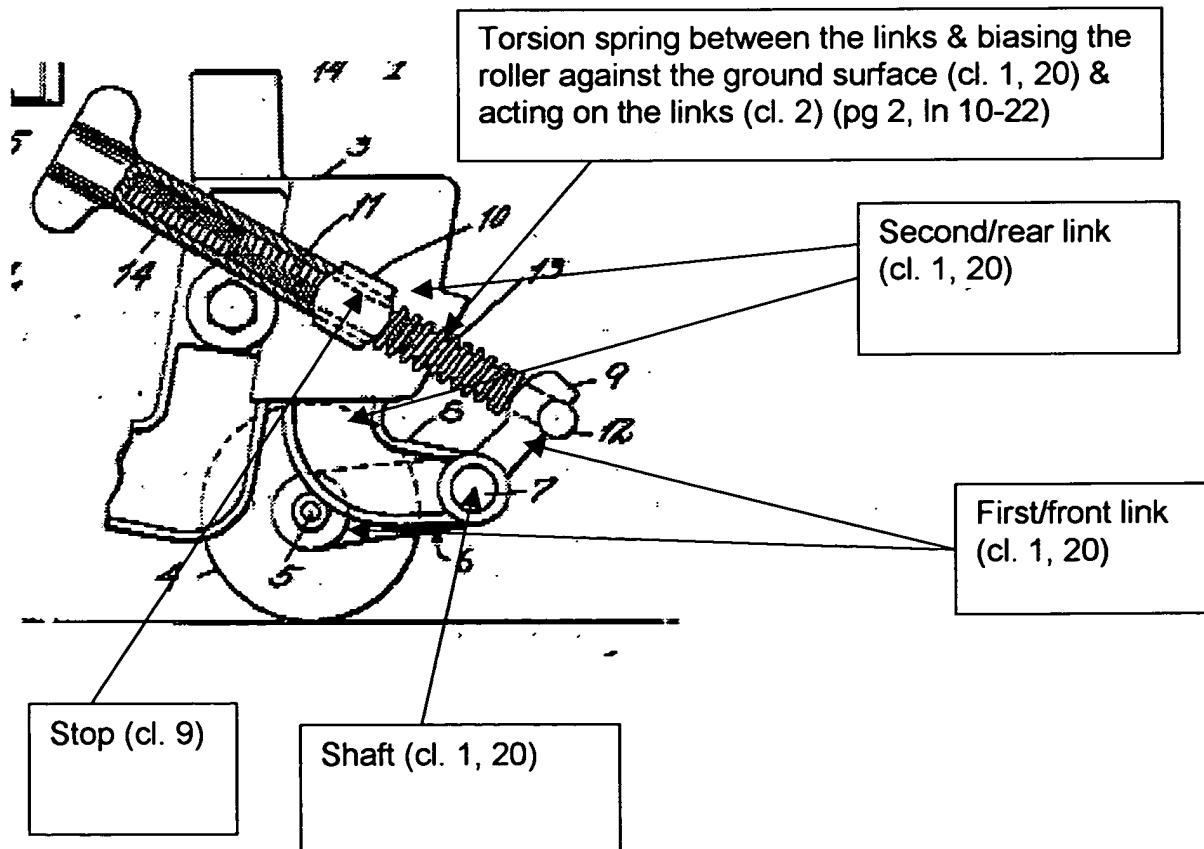

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

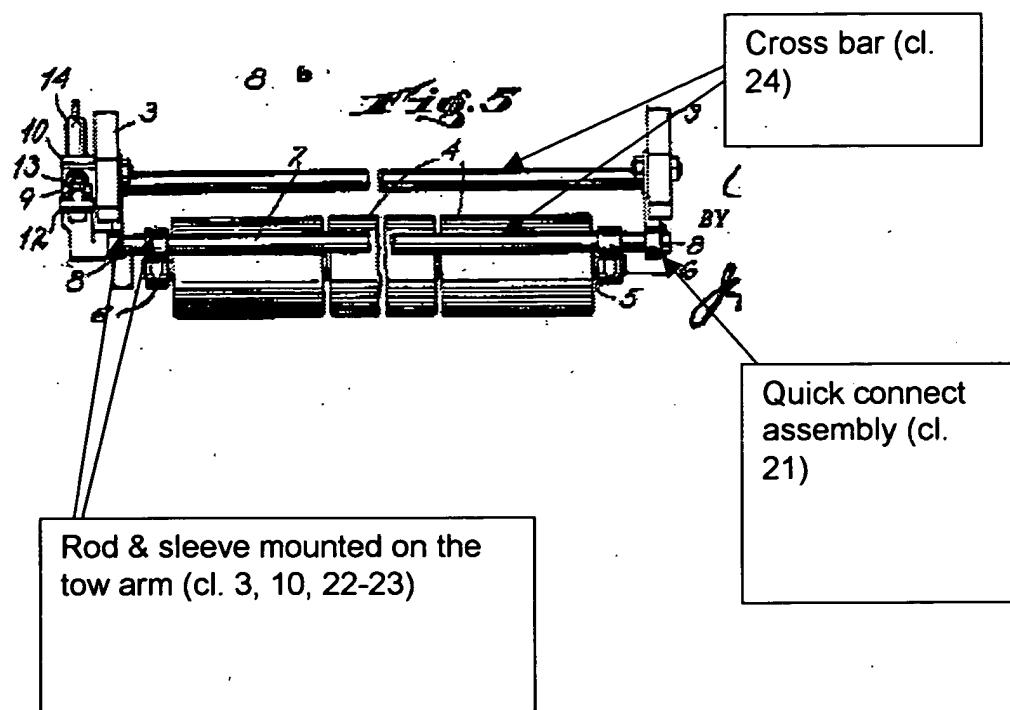

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 9-10, 20-25, new claim 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Worthington (cited by the Applicant; 2032784).

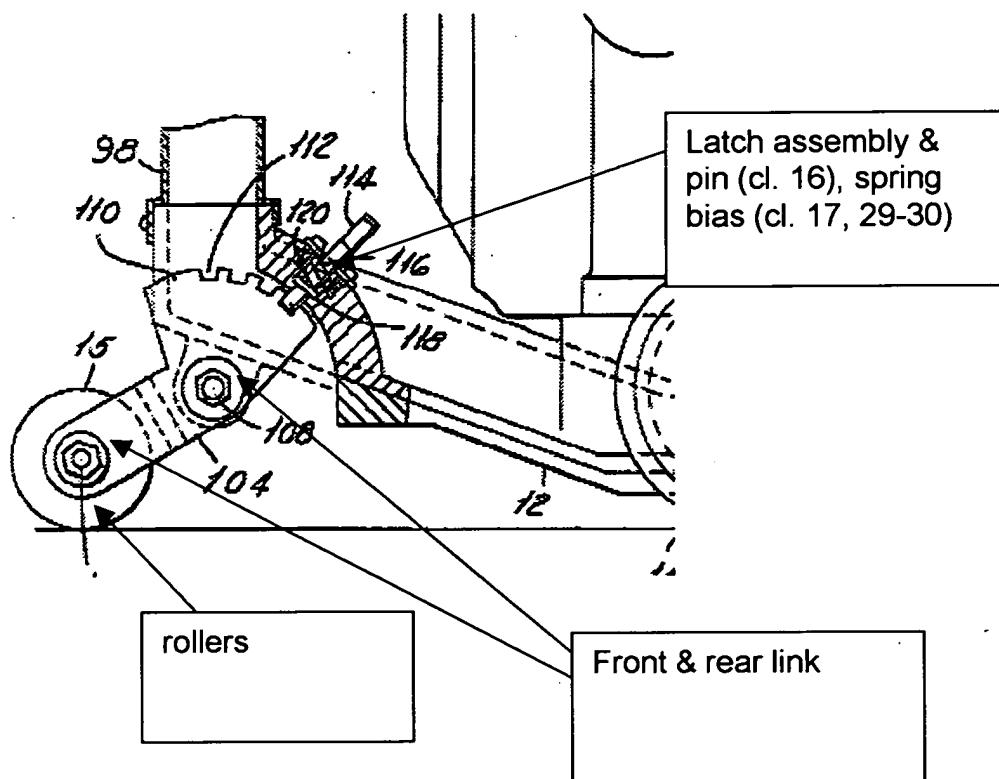

Worthington discloses and/or shows:

Claims 16-17, 29, 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Day et al (4044534).

Day discloses and/shows:

Allowable Subject Matter

4. Claim 31 is allowed.

Claims 4-8, 11-15, 18-19, 26-28 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments filed 8/30/2004 have been fully considered but they are not persuasive.

6. It is noted that the allowed claim 31, includes all of the subcombinations of a lawnmower: (a) the links & spring for biasing the roller; (b) a quick connect assembly; (c) a latch.

7. In response to applicant's argument that Worthington does not meet the claimed functional limitation of "configured to bias ... against a ground surface," since Worthington teaches other apparent uses of the spring bias, the fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985). It is noted that spring of Worthington is not only apparent of the uses taught in col. 2, ln 10-22, but also, capable to bias the roller against the ground.

8. In re applicant's argument that the helical spring of Worthington (ref 13) is not a torsion spring as required in claim 2, is not understood, since applicant's spring is also helical, see fig 9, ref 72.

9. In re applicant's argument that Worthington does not disclose a quick connect assembly is not agreed with, since as illustrated in the rejection above, the quick connect includes a rod mountable ... and a sleeve, that is clearly shown in the prior art.
10. In response to applicant's argument that Day does meet the claimed functional limitation of "a latch assembly configured to be ...," the fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985). It is noted that while applicant believes that the plunger cannot hold the roller assembly in a raised position, the examiner believes that the structural limitations claimed are met by the prior art, and it is capable to perform the functional recitation as well.

Conclusion

11. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
